## MESSAGE

I am extremely delighted to learn that the students of the Institute of Science, under the umbrella of Media and Publication Club, are bringing out a monthly newsletter, which will work as a window and will give panoramic view of the academic, co-curricular, extra-curricular, and sports accomplishments of the Institute of Science on a monthly basis. This electronic newsletter is also expected not only to connect with the fraternity of students, researchers, staff and faculty members but also with our alumni to update them about the activities taking place at their alma mater. This will also enable our students to admire the capabilities of other fellow students, and inspire them to achieve greater heights by learning about the capabilities and accomplishments of each other.

We, at the Institute of Science, Banaras Hindu University, offer a variety of platforms to our students to explore and discover their hidden talents and abilities. By providing opportunities to acquire knowledge, identify their unique capabilities and build self-confidence, we provide one of the best learning and enabling environments to equip our young students with the skills they need to successfully navigate through the challenges of an increasingly competitive environment. We aim for an all-round development of the personality of every student.

We welcome you to participate in this initiative of digital transformation of our Institute. I take this opportunity to thank the entire team and wish them luck in their creative endeavour. I applaud the editorial board members and wish them a very happy creative and productive New Year.
