## About Workshop

Water is the basic element of life, livelihood, food security and sustainable development. It is essential for economic and social development. Nowadays, escalating global population and climate change are putting immense pressure on water, food and energy security. Therefore, it is imperative to understand the nexus among Water-Food-Energy-climate. The purpose of this workshop is to address societal challenges in providing water, food and energy security to the mankind in future and how the nexus between Water-Food-Energy-climate can be exploited to address sustainability challenges. Although these challenges are different in India and USA because of the scale of mechanization, resources availability, and other factors, therefore, workshop will address differences and similarities in these challenges to develop mutual beneficial solutions.

### Themes

- Effect of climate change on water resources & agricultural production
- Modeling tools and techniques for water analysis and management
- Water & energy challenges in agri-food sector and innovative measures
- Sustainability concerns- ecological issues and ecosystem services
- Socio-economic and behavioral consideration in WFEC nexus
- Public-private partnership in WFEC issues

## Participation

The workshop will include invited lectures and those who are working in theme areas are invited for poster presentation. Contributors are requested to submit an abstract (<300 words; Times New Roman 12 pt; include paper title; author(s) name, institutional affiliation and Email Ids; 5 to 6 key words) to the organizing secretary latest by **20<sup>th</sup> Sep 2018** by email **wfec.iesd@gmail.com**. Registration will be subject to acceptance of abstract (30th September). Participants will have poster presentation.

### Registration fee:

- Research Scholars: INR 4000
- RA/Postdoctoral fellow: INR 5000
- Faculty/ Scientist: INR 6000
- Last date of registration is 10 October.
- Registration fee includes: Workshop kit, Lunch, High tea / Tea Only.
